What are the 9 major financial institutions?

Financial institutions, otherwise known as banking institutions, are corporations that provide services as intermediaries of financial markets. Broadly speaking, there are three major types of financial institutions: Depository institutions – deposit-taking institutions that accept and manage deposits and make loans, including banks, building societies, credit unions, trust companies, and mortgage loan companies; Contractual institutions – insurance companies and pension funds Investment ...

Financial institution - Wikipedia

Role of Financial Institutions. The various financial institutions generally act as intermediaries between the capital market and debt market. But the services provided by a particular institution depend on its type. The financial institutions are also responsible for transferring funds from investors to the companies.

Types of Financial Institutions | World Finance

There are two types of financial institutions: depository institutions and nondepository institutions. Depository institutions, such as banks and credit unions, pay you interest on your deposits and use the deposits to make loans. Nondepository institutions, such as insurance companies, brokerage firms, and mutual fund companies, sell financial products. Many financial institutions provide both depository and nondepository services.
