With startling revelations, Tsuyoshi Hasegawa rewrites the standard history of the end of World War II in the Pacific. By fully integrating the three key actors in the story--the United States, the Soviet Union, and Japan--Hasegawa for the first time puts the last months of the war into international perspective. From April 1945, when Stalin broke the Soviet-Japanese Neutrality Pact and Harry Truman assumed the presidency, to the final Soviet military actions against Japan, Hasegawa brings to light the real reasons Japan surrendered. From Washington to Moscow to Tokyo and back again, he shows us a high-stakes diplomatic game as Truman and Stalin sought to outmaneuver each other in forcing Japan's surrender; as Stalin dangled mediation offers to Japan while secretly preparing to fight in the Pacific; as Tokyo peace advocates desperately tried to stave off a war party determined to mount a last-ditch defense; and as the Americans struggled to balance their competing interests of ending the war with Japan and preventing the Soviets from expanding into the Pacific. Authoritative and engrossing, Racing the Enemy puts the final days of World War II into a whole new light.

An essential work of the cinematic history of the Weimar Republic by a leading figure of film criticism First published in 1947, From Caligari to Hitler remains an undisputed landmark study of the rich cinematic history of the Weimar Republic. Prominent film critic Siegfried Kracauer examines German society from 1921 to 1933, in light of such movies as The Cabinet of Dr. Caligari, M, Metropolis, and The Blue Angel. He explores the connections among film aesthetics, the prevailing psychological state of Germans in the Weimar era, and the evolving social and political reality of the time. Kracauer makes a startling (and still controversial) claim: films as popular art provide insight into the unconscious motivations and fantasies of a nation. With a critical introduction by Leonardo Quaresima which provides context for Kracauer ' s scholarship and his contributions to film studies, this Princeton Classics edition makes an influential work available to new generations of cinema enthusiasts.

This book presents a comprehensive account of more than 200 years of controversy on the classical theories of value and distribution. The author focuses on four, perhaps most critical, classics, viz., Adam Smith ' s Wealth of Nations, David Ricardo ' s Principles of Political Economy, Karl Marx ' s Capital and Piero Sraffa ' s Production of Commodities by Means of Commodities. The book highlights several significant differences in the theories of the four authors as it searches for the ' classical standpoint ' that separates them from the ' moderns ' . It throws fresh light on some old questions while introducing new, controversial interpretations in the literature surrounding it. It is unique in its organisation as it first presents the author ' s close reading of the theories of value and distribution in the four classics and then critically engages with the major alternative interpretations and criticisms of the theories discussed therein. Bringing original insights on theoretical positions, the book challenges canonical interpretations so as to discuss and analyse the flaws and weaknesses, in addition to the already obvious strengths, of widely celebrated theories. The theories discussed here emerge from questions like: what role does demand or human psychology play in the determination of value in classical theory? Do classical economists determine the distribution of income within the context of a theory of prices and resource allocation? What role does the notion of ' equilibrium ' play in classical theory and the theory of Sraffa? It will appeal to academics and students of economic theory and philosophy, as well as to the general reader.
