An urgent, on-the-scene account of chaos and compassion on the front lines of ground zero for Covid-19, from a senior doctor at New York City ' s busiest emergency room " Remarkable and inspiring . . . We ' re lucky to have this vivid firsthand account. " —A. J. Jacobs, bestselling author of The Year of Living Biblically
When former New York Times journalist Dan Koepfel texted his cousin Robert Meyer, a twenty-year veteran of the emergency room at Montefiore Medical Center in the Bronx, at the beginning of the Covid-19 crisis in the United States, he expected to hear that things were hectic. On a scale of 1 to 10, 10 being overwhelmed, where do you think you are? Koepfel asked. Meyer ' s grave reply—100—was merely the cusp of the crisis that would soon touch every part of the globe. In need of an outlet to process the trauma of his working life over the coming months, Meyer continued to update Koepfel with what he ' d seen and whom he ' d treated. The result is an intimate record of historic turmoil and grief from the perspective of a remarkably resilient ER doctor.
Every Minute Is a Day takes us into a hospital ravaged by Covid-19 and is filled with the stories of promises made that may be impossible to keep, of life or death choices for patients and their families, and of selflessness on the part of medical professionals who put themselves at incalculable risk. As fast-paced and high-tempo as the ER in which it takes place, Every Minute Is a Day is at its core an incomparable firsthand account of unrelenting compassion, and a reminder that every human life deserves a chance to be saved.

Explains in simple terms some of the work that doctors do.

After a deadly run-in with Weeping Angels and Autons in 1969 London, the Tenth and Thirteenth Doctors won the day, and went their separate ways. Thirteen returned with her Fam to their present, narrowly avoiding a devastating paradox that would ripple through time and space – or so they thought...

The Doctor arrives in a dystopian far future where the Earth is a barren wasteland where virtually no crops will grow.

A fireball crash lands in the forests of the Ukraine and when the locals investigate, they find what appears to be a metal coffin at the center of the devastation. They superstitiously conclude that the casket contains the body of an angel sent to Earth to give hope to the people. Centuries later the Doctor and his companions find themselves trapped in Kiev, 1240 -- a city under attack by the Mongols. They are enforced guests of the governor, Dmitri, whose assistant Yehven believes that if the coffin is desecrated, then "all who threaten us will be destroyed". When the coffin is opened by a group of men, a terrifying, skull-faced creature is freed, and kills a member of the group before fleeing. A spate of violent deaths ensue -- but this creature certainly isn't killing indiscriminately. How is this creature choosing its victims? Where has it come from -- and most importantly, can the Doctor do anything to halt its murderous trail of destruction?

A Doctor a Day is a novel about one physician and the physical, emotional and psychological toll of his dedication. He ' s a good doctor with ten years of unrelenting care for dying patients and their families. The pressure becomes unbearable when he is sued for malpractice, leading him to consider suicide as the only escape. Though the story is fictional, it reflects the all too common, real-life issues faced by practicing physicians in today ' s world. Why did I write this novel? My major goal was to provide insight into the mind of a physician by following the main character, Dr. Luke James, through his tenth year of medical practice. You become privy to his challenges and fears, unmasking the psychological burden he endures. It serves as an example of what many of today ' s physicians experience during their careers and how some can be driven to extremes. In the real world, an air of medical infallibility is still the prerequisite to instilling patient confidence. This expectation presents an unrealistic, psychologically exhausting burden ultimately damaging to doctors and patients alike. It might help explain why the physician suicide rate is fifty percent greater than the general population. Even worse, the mental health support systems designed to help physicians are severely lacking. This leads to the all-important question—especially critical given our continual demand for good medical care—Who heals our healers?
