Egyptian Art:In the Days of the Pharaohs 3100-320 BC ...

Ancient Egyptian art refers to art produced in ancient Egypt between the 31st century BC and the 4th century AD. It includes paintings, sculptures, drawings on papyrus, faience, jewelry, ivories, architecture, and other art media. It is also very conservative: the art style changed very little over time.

Art of ancient Egypt - Wikipedia

See Article History. Egyptian art and architecture, the ancient architectural monuments, sculptures, paintings, and decorative crafts produced mainly during the dynastic periods of the first three millennia bce in the Nile valley regions of Egypt and Nubia. The course of art in Egypt paralleled to a large extent the country's political history, but it depended as well on the entrenched belief in the permanence of the natural, divinely ordained order.

Egyptian art and architecture | History, Characteristics ...

The greatest artworks of the Old Kingdom are the Pyramids and Great Sphinx of Giza which still stand today but more modest monuments were created with the same precision and beauty. Old Kingdom art and architecture, in fact, was highly valued by Egyptians in later eras.

Ancient Egyptian Art - Ancient History Encyclopedia

The art of the Amarna period is so realistic that modern-day scholars have been able to reasonably suggest what physical ailments people in the pictures probably suffered from. Two of the most famous works of Egyptian art come from this time: the bust of Nefertiti and the golden death mask of Tutankhamun. Nefertiti (c. 1370-1336 BCE) was Akhenaten's wife and her bust, discovered at Amarna in 1912 CE by the German archaeologist Borchardt is almost synonymous with Egypt today.

The function of Egyptian art was twofold. First, to glorify the gods - including the Pharaoh - and facilitate human passage into the after-life. Second, to assert, propagandize and preserve the values of the day.

"His eloquent ability to weave facts, insights and interpretations into a compulsively readable account sets his book far above the clogged texts that too often pass for art history."-The Times Educational Supplement

Having the opportunity to teach math for over 25 years, I have found many days when you hit a brick wall. Whether it was in middle school, junior or senior high school, or at the community college, there were days when the new topic was not understood by the students. I could see it in their reaction (faces) to my explanation. Sometimes, I was the culprit. Knowing full well that the homework is a review of that day's topic, it must be delayed. As an educator teaching math, the crescendo of each day builds, as we go further into the school calendar. Someone, who missed out and could not grasp the idea, needed to be tutored. That luxury is not available. FRUSTRATIONS TEACHING MATH, gives the student an opportunity to see how basic math ideas are solved. Sometimes, I give two scenarios in solving a problem. Other times, a "cheating way" is shown, so that math can be understood and also be fun. Some of the topics covered are the various ways to factor a binomial, trinomial, or polynomial. Another favorite is grasping the concept of greatest common factor or least common multiple. Right triangle trigonometry for the middle school student is explained using boating as the source of frustration. How much to tip at a restaurant? What does a half-off sale really mean? Let us not forget the "story" or word problems that really cause concerns. Distance! Rate! Time! All these ideas plus games and many more mathematical topics are reviewed on my 45 day road trip from Delaware to Florida. Coming back, with several stops on the way home, we'll explore these "frustrations".

The painted and relief-cut walls of ancient Egyptian tombs and temples record an amazing continuity of customs and beliefs over nearly 3,000 years. Even the artistic style of the scenes seems unchanging, but this appearance is deceptive. In this work, Gay Robins offers convincing evidence, based on a study of Egyptian usage of grid systems and proportions, that innovation and stylistic variation played a significant role in ancient Egyptian art. Robins thoroughly explores the squared grid systems used by the ancient artists to proportion standing, sitting, and kneeling human figures. This investigation yields the first chronological account of proportional variations in male and female figures from the Early Dynastic to the Ptolemaic periods. Robins discusses in detail the proportional changes underlying the revolutionary style instituted during the Amarna Period. She also considers how the grid system influenced the composition of scenes as a whole. Numerous line drawings with superimposed grids illustrate the text.
