lines of the two solids intersect at point O, and a true view along the line AB will produce an ellipse. When cylinders of equal diameter intersect as shown in Fig. 12.8 the line at the intersection is straight and at 45° .

Interpntration - Engineering Drawing - Joshua Nava Arts

Technical Drawing - Interpenetration - Introduction. When two solids interpenetrate, (intersect), each other a straight line or a curved line of interpenetration is formed. Whether the line is curved or straight depends on the shape of the solids. To find the lines of interpenetration we find points
