in the industry. This system is easy to install, easy to maintain and easy to repair if necessary. Only one cable is used to operate the spring push system. This system can be operated with a hand crank winch or an approved motorized winch.

Goshen Lift System - Pop-Up Parts

The Coleman camper lift system is a bit different from the above two. Here, the winch attaches to a powerful chain whose main function is to drive a threaded screw. This screw exerts pressure to a distribution block that connects to the telescoping poles on the RV corner edges via the lift cable. [Replacing Your Camper's Lift Cables](#)

Goshen Lift System (How to) W/Pics | Pop up camper ...

The Goshen lift system is used by most of the pop up vehicle manufacturers. The cable is connected to a distribution block, enclosed in a tube running front to back under the vehicle frame. Within the tube is located a simple mechanism that utilizes one pulley to push four heavy duty springs through tubes routed to each corner of the trailer.
