Now referred to as Merchant Category Codes (MCC) or Transaction Category Codes (TCC), which are used to categorise businesses by industry based on the goods and services being sold. MCC codes are numbers which usually consist of four digits and relate to a given merchant's industry. These codes are standardised by the International Organization for Standardization (ISO) based in Geneva, Switzerland and hold the number ISO 18245.

A guide to MCC codes, TCC codes and MCG groups — Centus
A Merchant Category Code, or MCC, is a four-digit number that indicates your line of business and the types of goods or services you provide to your customers. Originally developed to simplify accounting for the year-end 1099 tax form reporting, the MCC code is now a critical piece in the payments landscape.

The Complete Guide to Merchant Category Codes (MCCs)

Merchant category codes (MCCs), or merchant classification codes, are a four-digit identifier that describes the type of goods or services a business provides. The codes, their meanings and classification are set by the International Organization for Standardization (ISO). Credit card processors, however, are the ones responsible for assigning each of the codes to a business or merchant.
