Michael J. Orosco, PhD 1, H. Lee Swanson, PhD 1, Rollanda OConnor, PhD 1, Cathy Lussier, PhD 1 1 University of California at Riverside, USA Corresponding Author:

Drawing on personal insights and research-based knowledge, this important work facilitates understanding of the psychological struggles of young African American males and offers ameliorative strategies. 🇺🇸 The work of 30 distinguished contributors, from Marion Wright Edelman to Ellis Cose 🇺🇸 Perspectives and solutions from disciplines as wide-ranging as clinical psychology, law, sociology, and poetry 🇺🇸 Original, cutting-edge research by the authors

This book offers a broader, more positive picture of African American fathers. Featuring case studies of African-descended fathers, this edited volume brings to life the achievements and challenges of being a black father in America. Leading scholars and practitioners provide unique insight into this understudied population. Short-sighted social policies which do not encourage father involvement are critically examined and the value of father engagement is promoted. The problems associated with the absence of a father are also explored. The second edition features an increased emphasis on: the historical issues confronting African descended fathers the impact of health issues on Black fathers and their children the need for therapeutic interventions to aid in the healing of fathers and their children the impact of an Afrikan-centered fathering approach and the need for research which considers systemic problems confronting African American fathers community focused models that provide new ideas for (re)connecting absent fathers learning tools including reflective questions and a conclusion in each chapter and more theory and research throughout the book. Part I provides a historical overview of African descended fathers including their strengths and shortcomings over the years. Next, contributors share their personal stories including one from a communal father working with underserved youth and two others that highlight the impact of absent fathers. Then, the research on father-daughter relationships is examined including the impact of father absence on daughters and on gender identity. This section concludes with a discussion of serving adolescents in the foster care system. Part II focuses on the importance of a two-parent home, communal fathering, and equalitarian households. Cultural implications and barriers to relationships are also explored. This section concludes with a discussion of the struggles Black men face with role definitions. The book concludes with a discussion of the impact of adoption and health issues on Black fathers and their children, and the need for more effective therapeutic interventions that include a perspective centered in the traditions and cultures of Afrika in learning to become a father. The final chapter offers an intervention model to aid in fatherhood. An ideal supplementary text for courses on fathers and fathering, introduction to the family, parenting, African American families/men, men and masculinity, Black studies, race and ethnic relations, and family issues taught in a variety of departments, the book also appeals to social service providers, policy makers, and clergy who work with community institutions.

Contains expanded content on economics and outcomes of treatment, as well as acute kidney injury. Covers hot topics such as the genetic causes of chronic kidney disease, ethical challenges and palliative care, and home hemodialysis. Discusses the latest advances in hypertensive kidney disease, vitamin D deficiency, diabetes management, transplantation, and more. Provides a clear visual understanding of complex information with high-quality line drawings, photographs, and diagnostic and treatment algorithms.

Offering historical and theoretical positions from a variety of art historians, artists, curators, and writers, this groundbreaking collection is the first substantive sourcebook on abstraction in moving-image media. With a particular focus on art since 2000, Abstract Video addresses a longer history of experimentation in video, net art, installation, new media, expanded cinema, visual music, and experimental film. Editor Gabrielle Jennings:a video artist herselfreveals as never before how works of abstract video are not merely, as the renowned curator Kirk Varndoe once put it, 🇺🇸pictures of nothing,🇺🇸 but rather amorphous, ungovernable spaces that encourage contemplation and innovation. In explorations of the work of celebrated artists such as Jeremy Blake, Mona Hatoum, Pierre Huyghe, Ryoji Ikeda, Takeshi Murata, Diana Thater, and Jennifer West, alongside emerging artists, this volume presents fresh and vigorous perspectives on a burgeoning and ever-changing arena of contemporary art.

This volume contains reviews on state-of-the-art Japanese research presented in the annual Spring and Autumn meetings of the Japanese Polymer Science Society. The aim of this section is to make information on the progress of Japanese Polymer Science, and on topics of current interest to polymer scientists in Japan, more easily available worldwide.

Comprehensive, authoritative, and designed for practical utility, this handbook presents evidence-based approaches for helping struggling readers and those at risk for literacy difficulties or delays. Leading experts explain how current research on all aspects of literacy translates into innovative classroom practices. Chapters include clear descriptions of effective interventions for word recognition, spelling, fluency, vocabulary, comprehension, and writing, complete with concrete examples and teaching scripts. Coverage also encompasses preschool literacy instruction and interventions for older readers, English language learners, and students with learning disabilities, as well as peer-mediated and tutoring approaches.

This issue of Anesthesiology Clinics covers Medically Complex Patients.
