Decision – making using probability In this chapter, we look at how we can use probability in order to aid decision – making. 6.1 Expected Monetary Value Intuition should now help to explain how probability can be used to aid the decision – making process. For example, suppose we ' re considering launching a new product on the market.

Probability and Statistics | University of London

Probability is the branch of mathematics concerning numerical descriptions of how likely an event is to occur, or how likely it is that a proposition is true. The probability of an event is a number between 0 and 1, where, roughly speaking, 0 indicates impossibility of the event and 1 indicates certainty.
