acute red eye accounts for approximately 1-4% of all primary care consultations. CAP 29 – Red Eye EM Curriculum: (click to view)

Red Eye — #EM3: East Midlands Emergency Medicine ...

The blood is trapped and makes the white of your eye turn bright red. It can be caused by a strong sneeze, heavy lifting, hard vomiting, or rubbing your eye a little too hard. You may be more...

Red and Bloodshot Eyes: Common Causes, Treatment

Red eye is the cardinal sign of ocular inflammation. The condition is usually benign and can be managed by primary care physicians. Conjunctivitis is the most common cause of red eye. Other common...

Diagnosis and Management of Red Eye in Primary Care ...

Conjunctivitis is an eye condition caused by infection or allergies. It usually gets better in a couple of weeks without treatment. Check if you have conjunctivitis. Conjunctivitis is also known as red or pink eye. It usually affects both eyes and makes them: bloodshot; burn or feel gritty; produce pus that sticks to lashes; itch; water

Conjunctivitis - NHS

Salt water, or saline, is one of the most effective home remedies for eye infections. Saline is similar to teardrops, which is your eye's way of naturally cleansing itself. Salt also has...

Home Remedies for Eye Infections: 6 Methods

“Red eye” is a non-specific term that describes the appearance of the eye. It can occur in one or both eyes. Red eye could be due to an illness, injury, eye infections, or other condition such as allergies. Doctors do not tend to take immediate action when a patient comes in with red eyes.

Red Bloodshot Eyes: Causes and Treatment Options

Symptoms. The most obvious sign of a subconjunctival hemorrhage is a bright red patch on the white (sclera) of your eye. Despite its bloody appearance, a subconjunctival hemorrhage should cause no change in your vision, no discharge from your eye and no pain.
