Relations by Christopher ...

Statistical analyses (or 'quantitative research') are widely used methods in the study of politics and international relations. While most students in our MPhil programme do not use such methods in their own research, it is likely that they will come across works that do in their course work or when reading about the topic of their research.

Research Methods for
International Relations
Practitioners ...

We still lack practical answers to one of the most basic questions in empirical research: How should researchers interpret meanings? The contributors take seriously the goals of both post-modernist and positivist researchers, as they offer detailed guidance on how to apply specific tools of analysis and how to circumvent their inherent limitations.
