Learn the math skills you need to process information, analyze data, and more with FINANCIAL MATH REVIEW, a 30-hour text-workbook. Through easy-to-understand directions and common vocabulary terms, you'll get the best instruction available on whole numbers, fractions, decimals, equations, percentages, and measurement. FINANCIAL MATH REVIEW also helps you get the most out of your calculator by giving you the quick tips you need. Plus, you'll learn how to use math to simplify your life and make better decisions.

Mathematics research papers provide a forum for all mathematics enthusiasts to exercise their mathematical experience, expertise and excitement. The research paper process epitomizes the differentiation of instruction, as each student chooses their own topic and extends it as far as their motivation and desire takes them. The features and benefits of the research paper process offer a natural alignment with all eight Common Core State Standards for Mathematical Practice. Writing Math Research Papers serves both as a text for students and as a resource for instructors and administrators. The Writing Math Research Papers program started at North Shore High School in 1991, and it received the 1997 Chevron Best Practices in Education Award as the premier high school math course in the United States. Author Robert Gerger's articles on high school mathematics research programs were featured in the National Council of Teachers of Mathematics publication Developing Mathematically Promising Students, the NCTM's 1999 Yearbook, Developing Mathematical Reasoning in Grades K - 12, and in the September 2017 issue of the Mathematics Teacher.

Student success in mathematics is dependent on focusing in class, practice, and the ability to verbally express mathematical thoughts. Write On! Math is a program that engages secondary school mathematics students in on-going writing projects that will strengthen their focus, their mathematics, and their oral and written communication skills. The program teaches technical writing strategies while demonstrating seven different levels of note taking and dozens of strategies to improve the sentence structure of students' mathematical explanations. Today's curricula and extensive testing policies require students to supply written explanations as part of their answers. Write On! Math will systematically teach students how to take better notes in math class. There is no better way to ensure you know something well than to have to teach it to somebody else, and the Write On! Math program requires students to do exactly that—that is why it improves their mathematics as well as teaches them valuable communication and writing techniques not taught in Humanities classes. For teachers using the program, Write On! Math will improve they way you, as a teacher, present material to your students in class and on your handouts! For students using the program, the strategies will apply to college classes and to other disciplines in addition to mathematics.
