The historical-structural method employed here rejects analyses that are excessively voluntaristic or deterministic. The authors show that while the state was able to mitigate certain adverse consequences of TNC strategies, new forms of dependency continued to limit Mexico's options. Originally published in 1985. This long-awaited new book from Cynthia Day Wallace picks up the thread of her best-selling "Legal Control of the Multinational Enterprise: National Regulatory Techniques and the Prospects for International Controls," In the present work she applies herself to legal and pragmatic

aspects of control surrounding MNE operations. The primary focus is on legal and administrative techniques and measures practised by host states to control - transparently or less so - foreign MNE activity within their territories, or even extraterritorially when effects are felt within national boundaries. The primary geographic focus is the six most investment-intensive industrialized states (namely, Canada, France, Germany, Japan, the United States and the United Kingdom). At the same time an important message of the present study is precisely the implication for the developing countries as well as for the emerging market economies of central and eastern Europe - and even Asian nations besides Japan, because it is the sharing of this very 'experience of years' that can best serve to facilitate a fuller participation on the part of the up-and-coming economies in the same global market place.

Suitable for both introductory anthropology and upper-division courses in cultural anthropology The campaign of the Cree people to protect their forest culture from the impact of hydro-electric development in northern Quebec has been widely-documented. Few have heard in any detail about this campaign's outcome and impact upon indigenous societies' futures. This text gives equal attention to the Cree leadership's successful strategies for dealing with major social and environmental pressures with the forces of acculturation and native communities' social destruction. The titles in the Cultural Survival Studies in Ethnicity and Change series, edited by David Maybury-Lewis and Theodore Macdonald, Jr. of Cultural Survival, Inc., Harvard University, focus on key issues affecting indigenous and ethnic groups worldwide. Each ethnography builds on introductory material by going further in-depth and allowing students to explore, virtually first-hand, a particular issue and its impact on a culture.

In the 1880s Europeans grabbed vast swaths of the African continent, using documents, not guns, as their weapon of choice. Steven Press follows a paper trail of questionable contracts to discover the confidence men who exploited a loophole in international law to assert sovereignty over lands, and whose actions touched off the Scramble for Africa.

Volume II (22 articles) covers multilateral institutions and agreements, regional institutions and agreements, and inter-policy linkages.
