## Table E The

Standard Normal Distribution

There is only one curve, the standard normal curve. All that you need to find the area under the curve (probability) is to determine the z-value of interest. With a z-value, you are ready to enter the table. Many standard normal tables provide the first two digits along the vertical axis and the third digit along the horizontal axis.

Standard Normal Table.

Tables and formulae provided in your exam  
Standard Normal Table.  
 $Z$  is the standard normal random variable. The table value for  $Z$  is the value of the cumulative normal distribution at  $z$ . This is the left-tailed normal table. As  $z$ -value increases, the normal table value also increases.

# File Type PDF

## Table E The

For example, the value  
for  $Z=1.96$  is  $P(Z < 1.96)$   
 $= .9750$ .
