This paper shows how the selectional restrictions of a range of predicates (neg-raising predicates like believe, truth-evaluating predicates like be true, inquisitive predicates like wonder, and ...

### Predicates of Relevance and Theories of Question Embedding

A sentence cannot be complete (independent) unless it has both a subject and a predicate; otherwise, a group of words is just a phrase or a clause. For example, a complete sentence could be, "Go!" It has both a subject ("you", understood, is the subject, as the sentence is in the imperative voice) and a verb ("go").

### Definition and Examples of a Predicate in a Sentence

**Andrea Moro, The raising of predicates: predicative noun ...**

The complementation pattern of certain question-embedding predicates, such as know and agree, presents a puzzle for the compositional semantics of clausal complementation, as the predicates seem to be able to combine with two distinct types of semantic objects: propositions and questions. The traditional approach to the semantics of these predicates, where embedded questions are reduced to ...

**The semantics of question-embedding predicates - Uegaki ...**

As nouns the difference between predicate and predicative. is that predicate is (grammar) the part of the sentence (or clause) which states something about the subject or the object of the sentence while predicative is (grammar) an element of the predicate of a sentence which supplements the subject or object by means of the verb predicatives may be nominal or adjectival.
