The Shortest Distance Between Love & Hate by Sandy Hall You are given an array colors, in which there are three colors: 1, 2 and 3. You are also given some queries. Each query consists of two integers i and c, return the shortest distance between the given index i and the target color c. If there is no solution return -1. Example 1:

Rapid Learning Cycles will help you find the shortest distance between you and a new product that your customers can buy.

"The most thorough, accurate, user-friendly, well-organized and inspiring guide for writers on the market today. Period."—Richard Carlson, #1 New York Times bestselling author of Don't Sweat the Small Stuff This expert guide has put the dream of acquiring a publisher within reach for thousands of writers. Whether your book idea is a completed manuscript or still in the planning stages, The Shortest Distance Between You and a Published Book offers comprehensive, industry-savvy guidance on the steps to take to sell your book to a major publisher. Literary agents often advise their clients to read this book as their first step. Susan Page is the author of several bestselling self-help books, and a veteran of the publishing industry. Here, she'll guide you step-by-step through the roadblocks that stall other writers and help you toward a publishing strategy that gets results. You'll find in-depth information on the early steps to take, writing title ideas, developing winning book proposals, finding an agent, understanding publishing contracts, promoting your book, and more. Throughout the process, Page coaches you through both the emotional and practical obstacles you're likely to face. It's a must-read for anyone interested in a career as a published author. "Page, as her subtitle claims, really does tell you what you need to know to get happily published. This self-help author (If I'm So Wonderful, Why Am I Still Single?) knows what she's talking about, whether she's advising on how to write a book proposal, find an agent or promote one's book . . . This is one of the more instructive guides to read before writing your book."—Publishers Weekly

The Rapid Learning Cycles framework is an approach to agile product development that has helped hundreds of teams get products to market faster. It untangles the knots that hang up teams building products that must obey the laws of physics, biology and/or chemistry by blending Agile with practices tailored for hardware and other tangible products.

A teen girl starting at a new school is torn between long-held loyalties and a bright new love in this irresistible new YA contemporary romance from the author of A Little Something Different. Paisley is really looking forward to college. She is ready to take charge of her destiny and embrace some new experiences! Finding a hot guy to make out with at her first ever college party seems like a great start...until her best friend informs her that mystery guy is actually Carter Schmitt. Paisley's sworn enemy who basically ruined their lives in middle school. So much for new people and exciting new experiences. Oh well. Paisley will just pretend he doesn't exist. Of course that would be easier if Carter, AKA her super-hot-sworn-enemy, hadn't ended up in three of her classes AND the same work study. Is it too late to rethink this college thing? Sandy Hall, author of A Little Something Different and A Prom to Remember, is heading back to college in this sweet and quirky contemporary romance. Praise for Sandy Hall: "If you need a cute romance to end your summer with, read this. It's sweet. It's adorable. It's full of emotions. It's one of the best romances I've ever read, and I'll be reading this one again multiple times." —Here's to Happy Endings on Been Here All Along "Romance with a twist." —Booklist on A Little Something Different

Africa is both a fertile and complex environment for business, unlike any other in the world. Understanding its idiosyncrasies and intricacies in order to make a business venture a success can take a significant amount of time and be costly without the adequate map to navigate it. "The Shortest Distance between Two Points Is Not a Straight Line in Africa" is a nonfiction book about doing business on the continent. The book gathers a collection of real-life stories from people with a practical experience in doing business in Africa across various industries and countries. Their rich experiences are shared through entertaining and informative conversations with the author. The book provides relevant and specific insights into doing business in Africa from professionals who have spent their lives growing their companies' footprint on the continent.

Bestselling author Kris Radish takes the emotional measure of mothers, daughters, sisters, and friends in her wise and wonderful new novel of a woman unsure if she's on the verge of a breakdown—or a breakthrough.... After all these years is there any way you would see me again? When Emma Lauryn Gilford heard the voice on her answering machine, she thought, How dare he? She's put a lot of distance between herself and Samuel, filling her life with work and family, lavishing her attention on her lovely nieces and a garden that's the pride of Higgins, South Carolina. So why does his voice still have the power to make her heart skip? Why can't she stop thinking about this man she'd forgotten so long ago? Emma has always been the dependable daughter, the mediator of the controlled chaos always surrounding her high-strung sisters and her widowed mother, Higgins's own senior citizen seductress. But with the annual Gilford family reunion just around the corner, at least two of her sisters approaching meltdown, and her favorite teenage niece taking sanctuary in her home, Emma's concrete wall of self-denial is showing cracks. And on the other side is a life she can't put off living a moment longer.

Although many companies have introduced product innovation processes, they are still struggling to achieve the financial results they expected. This book shows how to properly balance the need for speed with the drive for profitability. It demonstrates how to maximize the value of a new product portfolio, how to streamline the product innovation process, and how to achieve growth that is both profitable and sustainable. New product success is not simply about developing new products that sell; it's about getting them to market quickly with the lowest cost and the highest return. Dr. Robert G. Cooper and Dr. Scott J. Edgett use their latest research and draw upon their combined 60 years of experience in the field to show you what the companies that continuously win at new products are doing. Top performers have discovered how to properly balance the need for speed with profitability. With a new process they call NexGen(TM) Stage-Gate(R), Dr. Cooper and Dr. Edgett show precisely how you can ensure that your innovation is not only lean and rapid but profitable as well. For more information, visit: www.stage-gate.com

A Wrinkle in Time is the winner of the 1963 Newbery Medal. It was a dark and stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. A Wrinkle in Time, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.
