If your television is still not receiving a signal, reset the cable box by unplugging it and plugging it back in. There may be an issue with your signal or the box itself, so try switching the connections to another device. If the picture works with another device, contact your provider for service for the box itself.

 Features of repair of TVs RCA, do not differ from repair of modern TVs of other trade marks. Faulty TVs can have a variety of character, because the TV device is complex, and its work is affected not only by changing the properties of any of the components (or chain of components), but also software violation - if the TVs of the first issues, equipped with processor control, programming was limited remembering the parameters of the image state, and also the preset channel and initial volume ...
